EDUCATION

William Paterson University
Bachelor of Science, Computer Science
• **GPA:** 3.9
• **Achievements:** Dean's List

May 2027
Wayne, NJ

TECHNICAL SKILLS

- **Languages:** Python, SQL, JavaScript, C++
- **Frameworks:** Django, Django REST Framework, React, Bootstrap, Dash
- **Machine Learning:** PyTorch, scikit-learn, Transfer Learning, CNNs, Classification, Model Evaluation
- **Data Analysis:** pandas, NumPy, Matplotlib, Seaborn, Plotly
- **Developer Tools:** Git, GitHub, Jupyter Notebook, Google Colab, VS Code, Insonmia, AI-Assisted Software Development
- **Web Technologies:** HTML, CSS, REST APIs, dotCMS, TypeScript
- **Software Development Methodologies:** Waterfall, Agile
- **Databases:** Vector Databases (pgvector)

EXPERIENCE

William Paterson University
Student Webmaster and Developer

Wayne, NJ · **May 2024 - Present**

- Maintain and improve university websites using HTML, CSS, and JavaScript while ensuring accessibility, responsiveness, and consistent design.
- Collaborate with faculty and staff to develop web content, reusable templates, and streamlined digital workflows following Agile software development methodologies.
- Troubleshoot website issues, complete bug fixes, and optimize page performance across desktop and mobile devices using AI-assisted software development practices when appropriate.

President, Cybersecurity Club

Wayne, NJ · **Oct 2024 - Present**

- Lead cybersecurity workshops, competitions, and awareness events for more than 20 club members while applying Agile software development methodologies to event planning.
- Organized the university's participation in the National Cyber League competition, helping the team achieve a top 5% finish through structured preparation and problem-solving.
- Collaborate with faculty to expand technical learning and mentorship opportunities for members through Waterfall software development methodologies and organized project planning.

PROJECTS

Plant Disease Detection Web Application

Jul 2026

- Developed a full-stack web application that classifies uploaded leaf images across 38 plant disease and healthy-plant categories.
- Fine-tuned a transfer-learning image classification model using the PlantVillage dataset, achieving approximately 94% test accuracy.
- Built a Django REST API that preprocesses uploaded images, performs model inference, and returns plant disease predictions with confidence scores.
- Created a responsive React interface with confidence-based validation that flags uncertain predictions and requests clearer images.

University Website Renovation

2024

- Collaborated on the redesign of the William Paterson University website, including its homepage and navigation structure.
- Developed reusable website templates applied across 5,000+ pages, improving consistency and simplifying content updates.
- Improved accessibility and responsive behavior across desktop and mobile devices.

RAG-Based Academic Research Assistant

- Technologies: Python, Django REST Framework, React, PostgreSQL, Docker, PyMuPDF, JWT.

- Developing a full-stack Retrieval-Augmented Generation (RAG) research assistant for uploading, processing, searching, and querying academic papers through natural-language questions.
- Built a Django REST API with JWT authentication, user-owned document collections, secure PDF uploads, PostgreSQL persistence, ownership-based authorization, and a Dockerized development environment.
- Implemented a PDF ingestion and preprocessing pipeline using PyMuPDF to extract page-level text and generate deterministic, page-aware document chunks with configurable chunk size and overlap for downstream semantic retrieval.
- Designed persistent DocumentChunk storage with processing states, page metadata, error handling, and REST endpoints for document processing and chunk retrieval; validated the backend with 38 automated tests plus API smoke testing.
- Built a React/TypeScript interface for document processing, status tracking, error reporting, and page-referenced chunk previews, with production linting and builds passing successfully.

CERTIFICATIONS

- Meta Full-Stack Developer Professional Certificate: July 2026; Meta (Coursera)
- IBM Data Science Professional Certificate: April 2026; IBM (Coursera)
